INDEX TO VOLUME X

Actinomyces hominis in glucose broth, Club-formation by, with a note on *B. actinomycetum comitans* 569
Anaerobes, Further cultural characteristics differentiating *B. chauvoei* from other 449
Anaerobic spore-bearing bacteria, Hydrogen sulphide production by 439
—— sporulating thermophiles. Some observations on a new group of bacteria 37
Atkins, K. N., Conn, H. J., Brown, J. H., Cohen, B., Hucker, G. J., and Tanner, F. W. Recent work on the descriptive chart and the manual of methods 315
Autotrophic bacterium, an, oxidizing sulfur under acid conditions. Concerning the carbon and nitrogen nutrition of *Thiobacillus thiooxidans* .. 165
—— ——, an, oxidizing sulfur under acid conditions, Concerning the physiology of *Thiobacillus thiooxidans* 135

Bacteria, A study of anaerobic 513
——, anaerobic spore-bearing, Hydrogen sulphide production by 439
——, A study of the chemical differentiation of 13
——, Some observations on a new group of, Anaerobic sporulating thermophiles 37
——, The biochemistry of the granulated lactic acid, from cereals 63
——, Thermophilic, Relation of temperature to the growth of 421
Bacterial cultures, Indol and skatol determination in 105
—— spores, Differential staining of living and dead 25
—— variation, On 473
Bacteriological, The, content of market meats 543
Bacteriophage, Old stock cultures as a source of 59
Bacterium typhosum, On the survival of, intraperitoneally implanted in collodion sacs 47
B. actinomycetum comitans, Club-formation by *Actinomyces hominis* in glucose broth, with a note on 569
B. botulinus in various media, Studies on the metabolism of, XXVI 321
B. chauvoei, Further cultural characteristics differentiating, from other anaerobes 449
B. coli, The sexual cycle of, in relation to the origin of variants. With special reference to Neisser and Massini's *B. coli-mutabile*. Studies in microbic heredity II 579
B. coli-mutabile, with special reference to Neisser and Massini's. The sexual cycle of *B. coli* in relation to the origin of variants. Studies in microbic heredity. II 579
Bayne-Jones, Stanhope. Club-formation by *Actinomyces hominis* in glucose broth, with a note on *B. actinomycetum comitans* 569

Bibb, Lewis B. Long tube method of cultivating microorganisms with observations on mobile colonies in liquid medium..... 561
Biochemistry, The, of the granulated lactic acid bacteria from cereals... 63
Biological investigation of peat..... 87
Brewer, C. M. The bacteriological content of market meats..... 543
Brown, J. Howard. A study of anaerobic bacteria..... 513
Brown, J. H., Conn, H. J., Atkins, K. N., Cohen, B., Hucker, G. J., and Tanner, F. W. Recent work on the descriptive chart and the manual of methods..... 315
Bryant, Carrie Kirk. A new- or delta-type streptococcus..... 53

Carbohydrates, Fermentation of, and polyatomic alcohols by *Vibrio cholerae*. Contributions to the knowledge of *Vibrio cholerae*. I..... 197
Carbon and nitrogen nutrition of *Thiobacillus thiooxidans*, an autotrophic bacterium oxidizing sulfur under acid conditions, Concerning the..... 165
Carroll, W. R., Fred, E. B., and Peterson, W. H. The occurrence of a red pigment-producing organism in corn mash of the acetone butyl alcohol fermentation..... 97
Cereals, The biochemistry of the granulated lactic acid bacteria from..... 63
Chemical differentiation of bacteria, A study of the..... 13
Chocolate cream candies, *Clostridium multifermentans* in..... 413
Clostridium chauvei and *Clostridium edematis*, Studies on certain characteristics of..... 265
Clostridium edematis, Studies on certain characteristics of *Clostridium chauvei* and..... 265
Clostridium multifermentans in chocolate cream candies..... 413
Clough, Ray W. and Fellers, Carl R. Indol and skatol determination in bacterial cultures..... 105
Club-formation by *Actinomyces hominis* in glucose broth, with a note on *B. actinomycetum comitans*..... 569
Cohen, B., Conn, H. J., Atkins, K. N., Brown, J. H., Hucker, G. J., and Tanner, F. W. Recent work on the descriptive chart and the manual of methods..... 315
Concerning the carbon and nitrogen nutrition of *Thiobacillus thiooxidans*, an autotrophic bacterium oxidizing sulfur under acid conditions..... 165
—— the physiology of *Thiobacillus thiooxidans*, an autotrophic bacterium oxidizing sulfur under acid conditions..... 135
Collodion sacs, On the survival of *Bacterium typhosum* intraperitoneally implanted in..... 47
Colon-typhoid group. Observations on a primitive form of sexuality in the. (Zygospore formation) Studies in microbic heredity. I..... 481
Committee on bacteriological technique. H. J. Conn, Chairman. Recent work on the descriptive chart and the manual of methods..... 315
Conn, H. J., Atkins, K. N., Brown, J. H., Cohen, B., Hucker, G. J., and Tanner, F. W. Recent work on the descriptive chart and the manual of methods..... 315
Contributions to the knowledge of *Vibrio cholerae*. I. Fermentation of carbohydrates and polyatomic alcohols by *Vibrio cholerae*..... 197

Corn mash, The occurrence of a red pigment-producing organism in, of the acetone butyl alcohol fermentation..... 97

Damon, S. R., and Feirer, W. A. Anaerobic sporulating thermophiles. Some observations on a new group of bacteria..... 37
Delta-type, A new- or, streptococcus..... 53
Descriptive chart and the manual of methods, Recent work on the..... 315
Differential staining of living and dead bacterial spores..... 25
Disinfectants, The value of some tellurium compounds as. Studies on tellurium..... 79

Feirer, W. A., and Damon, S. R. Anaerobic sporulating thermophiles. Some observations on a new group of bacteria..... 37
Fellers, Carl R., and Clough, Ray W. Indol and skatol determination in bacterial cultures..... 105
Fermentation, The occurrence of a red pigment-producing organism in corn mash of the acetone butyl alcohol..... 97
Fred, E. B., Peterson, W. H., and Carroll, W. R. The occurrence of a red pigment-producing organism in corn mash of the acetone butyl alcohol fermentation..... 97
Fred, E. B., Peterson, W. H., and Stiles, H. R. The biochemistry of the granulated lactic acid bacteria from cereals..... 63
Further cultural characteristics differentiating *B. chauvoei* from other anaerobes..... 449

Gates, Frederick L. On the survival of *Bacterium typhosum* intraperitoneally implanted in collodion sacs..... 47
Gundersen, E., and Thjøtta, T. A streptothrix isolated from the blood in a case of acute rheumatism with remarks upon the classification of ray fungi. 1

Haines, A. W., and Schlingman, A. S. Further cultural characteristics differentiating *B. chauvoei* from other anaerobes..... 449
Heredity, Studies in microbic. I. Observations on a primitive form of sexuality. (Zygospore formation) in the colon-typhoid group..... 481
—— —— ——. II. The sexual cycle of *B. coli* in relation to the origin of variants. With special reference to Neisser and Massini's *B. coli-mutabile*..... 579
Hill, Grace A. *Clostridium multifermentans* in chocolate cream candies.... 413
Hopkins, B. S., and Munn, Lottie E. Studies on tellurium. The value of some tellurium compounds as disinfectants..... 79
Hucker, G. J., Conn, H. J., Atkins, K. N., Brown, J. H., Cohen, B., and Tanner, F. W. Recent work on the descriptive chart and the manual of methods..... 315
Hydrogen sulphide production by anaerobic spore-bearing bacteria..... 439

Indol and skatol determination in bacterial cultures..... 105
—— studies..... 459
Itano, Arao. Biological investigation of peat..... 87

Kahn, Morton Charles. Hydrogen sulphide production by anaerobic spore-bearing bacteria..... 439
Koser, S. A., and Mills, J. H. Differential staining of living and dead bacterial spores..... 25
Kulp, Walter L. Indol studies..... 459

Lactic acid bacteria, The biochemistry of the granulated, from cereals..... 63
Larsen, Arnd, and Ørskov, J. On bacterial variation..... 473
Levine, Victor E. The reducing properties of microörganisms with special reference to selenium compounds..... 217
Long tube method of cultivating microörganisms with observations on mobile colonies in liquid medium..... 561

Mallmann, W. L. Old stock cultures as a source of bacteriophage..... 59
Manual of methods, Recent work on the descriptive chart and the..... 315
Meats, The bacteriological content of market..... 543
Mellon, Ralph R. Studies in microbic heredity. I. Observations on a primitive form of sexuality. (Zygospore formation) in the colon-typhoid group..... 481
——, —— —— ——. II. The sexual cycle of *B. coli* in relation to the origin of variants. With special reference to Neisser and Massini's *B. coli-mutabile*..... 579
Metabolism, Studies on the, of *B. botulinus* in various media. XXVI..... 321
Method, Long tube, of cultivating microörganisms with observations on mobile colonies in liquid medium..... 561
Meyer, K. F., and Wagner, E. (in coöperation with C. C. Dozier). Studies on the metabolism of *B. botulinus* in various media. XXVI..... 321
Microbic heredity, Studies in. I. Observation on a primitive form of sexuality (Zygospore formation) in the colon-typhoid group..... 481
Microörganisms, Long tube method of cultivating, with observations on mobile colonies in liquid medium..... 561
——, The reducing properties of, with special reference to selenium compounds..... 217
Mills, J. H., and Koser, S. A. Differential staining of living and dead bacterial spores..... 25
Munn, Lottie E., and Hopkins, B. S. Studies on tellurium. The value of some tellurium compounds as disinfectants..... 79

Neisser and Massini's *B. coli-mutabile*, The sexual cycle of *B. coli* in relation to the origin of variants. With special reference to. Studies in microbic heredity. II..... 579
New- or delta-type streptococcus, A..... 53
Nitrogen nutrition of *Thiobacillus thiooxidans*, an autotrophic bacterium oxidizing sulfur under acid conditions, Concerning the carbon and..... 165
Nobechi, Keizo. Contributions to the knowledge of *Vibrio cholerae*. I. Fermentation of carbohydrates and polyatomic alcohols by *Vibrio cholerae*..... 197

Occurrence, The, of a red pigment-producing organism in corn mash of the acetone butyl alcohol fermentation 97
Old stock cultures as a source of bacteriophage 59
On bacterial variation 473
—— the survival of *Bacterium typhosum* intraperitoneally implanted in collodion sacs 47
Ørskov, J., and Larsen, Arnd. On bacterial variation 473

Peat, Biological investigation of 87
Peterson, W. H., Fred, E. B., and Carroll, W. R. The occurrence of a red pigment-producing organism in corn mash of the acetone butyl alcohol fermentation 97
Peterson, W. H., Fred, E. B., and Stiles, H. R. The biochemistry of the granulated lactic acid bacteria from cereals 63
Physiology, Concerning the, of *Thiobacillus thiooxidans*, an autotrophic bacterium oxidizing sulfur under acid conditions 135
Polyatomic alcohols, Fermentation of carbohydrates and, by *Vibrio cholerae*. Contributions to the knowledge of *Vibrio cholerae*. I 197

Ray fungi, A streptothrix isolated from the blood in a case of acute rheumatism with remarks upon the classification of 1
Recent work on the descriptive chart and the manual of methods 315
Red pigment-producing organism, The occurrence of a, in corn mash of the acetone butyl alcohol fermentation 97
Reducing, The, properties of microörganisms with special reference to selenium compounds 217
Relation of temperature to the growth of thermophilic bacteria 421
Rheumatism, A streptothrix isolated from the blood in a case of acute, with remarks upon the classification of ray fungi 1

Schlingman, A. S., and Haines, A. W. Further cultural characteristics differentiating *B. chauvoei* from other anaerobes 449
Scott, Joseph P. Studies on certain characteristics of *Clostridium chauvei* and *Clostridium edematis* 265
Selenium compounds, The reducing properties of microörganisms with special reference to 217
Sexuality, Observations on a primitive form of, (Zygospore formation) in the colon-typhoid group. Studies in microbic heredity. I 481
Skatol determination in bacterial cultures. Indol and 105
Starkey, Robert L. Concerning the carbon and nitrogen nutrition of *Thiobacillus thiooxidans*, an autotrophic bacterium oxidizing sulfur under acid conditions 165
——. Concerning the physiology of *Thiobacillus thiooxidans*, an autotrophic bacterium oxidizing sulfur under acid conditions 135
Stearn, Allen E., and Stearn, Esther Wagner. A study of the chemical differentiation of bacteria 13
——, Esther Wagner, and Stearn, Allen E. A study of the chemical differentiation of bacteria 13

Stiles, H. R., Fred, E. B., and Peterson, W. H. The biochemistry of the granulated lactic acid bacteria from cereals..... 63
Streptothrix, A, isolated from the blood in a case of acute rheumatism with remarks upon the classification of ray fungi..... 1
Streptococcus, A new or delta-type..... 53
Studies in microbic heredity. I. Observations on a primitive form of sexuality. (Zygospore formation) in the colon-typhoid group..... 481
—— —— ——. II. The sexual cycle of *B. coli* in relation to the origin of variants. With special reference to Neisser and Massini's *B. coli-mutabile*..... 579
—— on certain characteristics of *Clostridium chauvei* and *Clostridium edematis* 265
—— on the metabolism of *B. botulinus* in various media. XXVI..... 321
—— on tellurium. The value of some tellurium compounds as disinfectants. 79
Study, A, of anaerobic bacteria..... 513
——, A, of the chemical differentiation of bacteria..... 13
Sulfur, Concerning the carbon and nitrogen nutrition of *Thiobacillus thiooxidans*, an autotrophic bacterium oxidizing, under acid conditions..... 165
——, Concerning the physiology of *Thiobacillus thiooxidans*, an autotrophic bacterium oxidizing, under acid conditions..... 135

Tanner, F. W., Conn, H. J., Atkins, K. N., Brown, J. H., Cohen, B., and Hucker, G. J. Recent work on the descriptive chart and the manual of methods..... 315
—— and Wallace, George I. Relation of temperature to the growth of thermophilic bacteria..... 421
Tellurium, Studies on. The value of some tellurium compounds as disinfectants..... 79
Thermophiles, Anaerobic sporulating. Some observations on a new group of bacteria..... 37
Thermophilic bacteria, Relation of temperature to the growth of..... 421
Thiobacillus thiooxidans, an autotrophic bacterium oxidizing sulfur under acid conditions, Concerning the carbon and nitrogen nutrition of 165
—— ——, an autotrophic bacterium oxidizing sulfur under acid conditions, Concerning the physiology of..... 135
Thjøtta, T., and Gundersen, E. A streptothrix isolated from the blood in a case of acute rheumatism with remarks upon the classification of ray fungi..... 1

Vibrio cholerae, Contributions to the knowledge of. I. Fermentation of carbohydrates and polyatomic alcohols by *Vibrio cholerae*..... 197
—— ——, Fermentation of carbohydrates and polyatomic alcohols by. Contributions to the knowledge of *Vibrio cholerae*. I..... 197

Wagner, E., and Meyer, K. F. (in coöperation with C. C. Dozier). Studies on the metabolism of *B. botulinus* in various media. XXVI..... 321
Wallace, George I., and Tanner, Fred W. Relation of temperature to the growth of thermophilic bacteria..... 421
